## The Teaching Program

Kiro Kids two day seminar on management of the pregnant woman is an in-depth, innovative training program . Developed by Kiro Kids in consultation with a practicing Australian Midwife with a special interest in natural, minimal intervention and assisting second time mothers who had a first time caesarean section to have a natural, vaginal birth it is a cutting edge, long overdue teaching program.

## The Seminar Presenter

Dr Neil Davies has been practicing paediatrics and chiropractic pregnancy management for over 30 years. He has developed a system of chiropractic methodology for treating pregnant women based around the Kiro Kids NeuroImpulse Protocol technique. Brilliant in their simplicity, these procedures will greatly empower the family chiropractor to not just manage pregnancy related pain syndromes, but to make the whole pregnancy and delivery experience a special event.

## Overview of Teaching Content

### Day 1 Before Conception & Pregnancy

- Hygienic, preconceptive care
- The clinical history in the pregnant patient
- Assisting the pregnant patient to make delivery and labour room decisions
- Examining the pregnant patient
